Phone Mockup

Smartphone mockup kit for video presentations and web promo, for demonstrating websites, online services, internet shops and mobile apps. It's very easy to use and customize.

Phone models in the template look realistic and neat. The smooth slow animation provides a careful look at the screen. Minimal and stylish white background draws the viewer's attention to your content on the device. It's a very positive color popular in web design.

It contains 14 footages in a minimalist style with a smartphone. They show frontal and diagonal views of your pages and the user interface. The mockups are floating in the air with the trendy anti gravity effect.

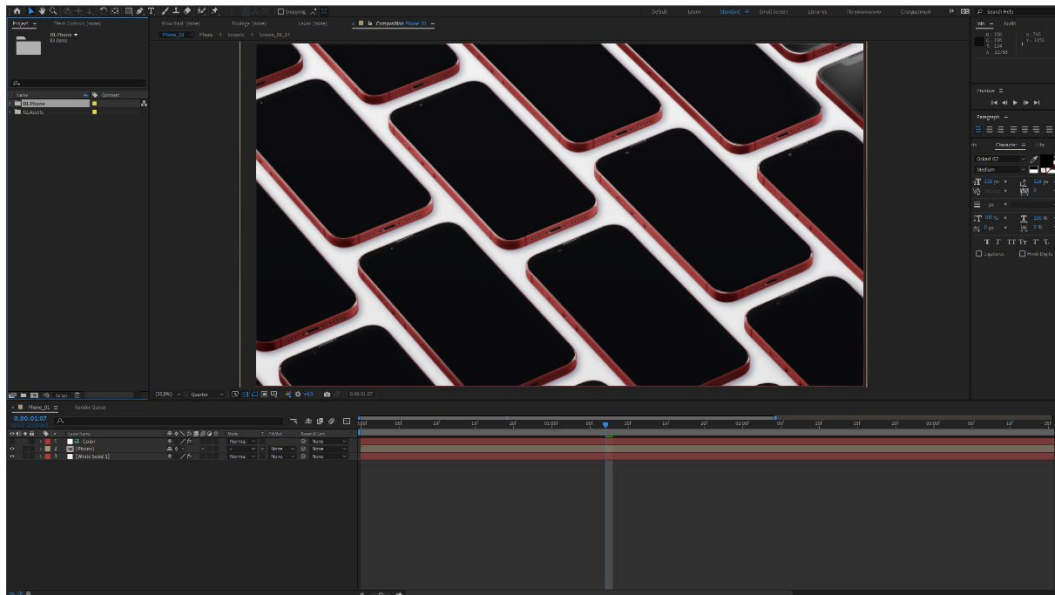

Project features:

- 14 smartphone scenes
- Color control
- Insert screens, photo or video
- Modular structure
- No plugins required
- After Effects CC18 and above
- 4K 3840×2160
- No plugins required
- Music and screens not included

How to edit a project.

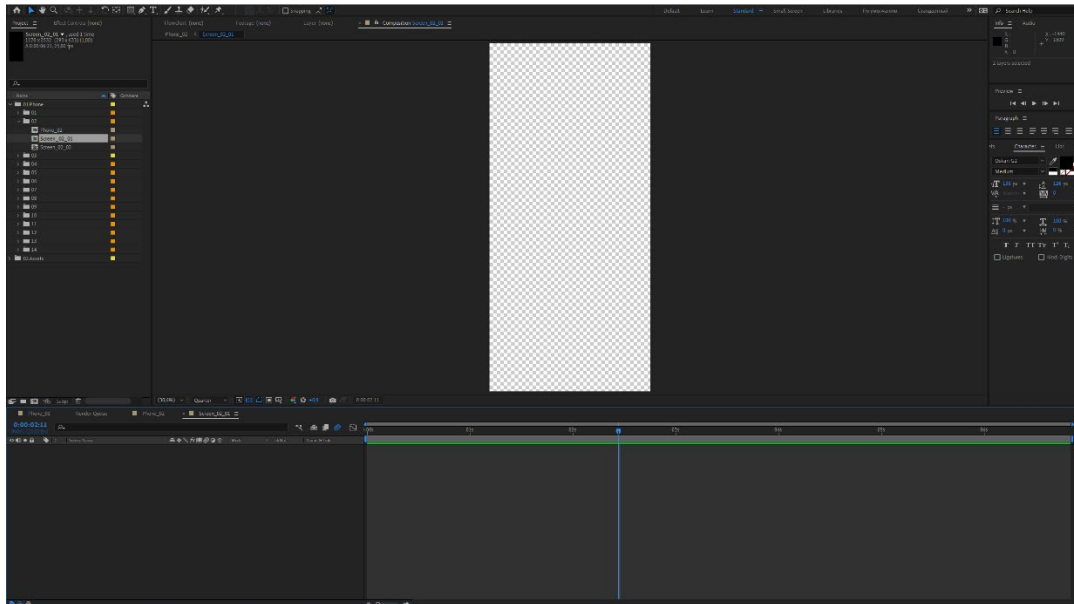

Open project. In the "Project" window, you will see a folder for editing "01.Phone".

The project has a modular structure and each module has its own separate folder for editing. You can see it in the picture below.

For example, to insert your screenshot or video into the display, open the composition "Screen_02_01" from the "Project" panel.

Other compositions in the project are edited using the same principle.
